## Downloads

Did you know that there is also an **IGV web application** that runs only in a web browser, does not use Java, and requires no downloads? See <https://igv.org/app>. Click on the [Help](#) link in the app for more information about using IGV-Web.

### Install IGV 2.8.3

See the [Release Notes](#) for what's new in each release.

**IGV Mac App**

Download and unzip the Mac App Archive, then double-click the IGV application to run it. You can move the app to the *Applications* folder, or anywhere else.

**MacOS Catalina users:** We sign our Mac App as a trusted Apple developer, but it is not yet notarized by Apple (a new requirement in Catalina). To run it, right-click on the downloaded IGV app; select "Open" from the menu; and click the "Open" button in the window that pops up. After that, double-clicking on the app will also work.

**IGV for Windows**

Download and run the installer. An IGV shortcut will be created on the Desktop; double-click it to run the application.

**IGV for Linux**

Download and unzip the Archive. See the downloaded *readme.txt* for further instructions.

**IGV and igvtools to run on the command line (all platforms)**

Download and unzip the Archive. **Requires Java 11**. See the downloaded *readme.txt* and *igvtools\_readme.txt* for further instructions.

### Other IGV Versions

[Development Snapshot Build](#). Latest development snapshot; built at least nightly

IGV tools can help you visualize bedgraph and bam files  
Make sure genome is set to mm10

Load an unpacked version of Tere's bedgraph file

We will cover making TDF files later

Eventually, if you want to load multiple files together, you'll need TDF files otherwise the file format will be too big

- It will take several minutes for the bedgraph to load because of the size of the file

Right click on the left column to adjust track features

Click and drag along the kb window to zoom in on specific regions
